(57)Abstract:

PURPOSE: To easily and accurately execute document distributing work by outputting only a changed part in a document to distributed destinations registered in a preceding edition at the time of revising a document and outputting the whole document to newly added distributed destinations 2.

CONSTITUTION: While a pointing device input part 2 receives an input from a pointing device, an operation part 3 executes interface with an operator and a control part 4 controls the whole system. A document history information storing part 5 stores document history information in each edition and a distributed destination list information storing part 6 stores the history information of a distributed destination list in each document. A display part 7 displays the contents of a document in editing or an operation guidance message or the like by a visual pattern. No information is outputted to a person deleted from the list of distributed destinations, only a changed part is outputted to a person which is not changed and the whole document is outputted to a newly added person.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
